Worksheet #1

Activity: Identify Stakeholders

List your continuity program's internal stakeholders that should be a part of your Continuity Working Group (CWG). List your continuity program's external stakeholders that may be impacted by the performance of your essential functions and should participate in your CWG.

Stakeholder Roster			
Internal	Currently on CWG	External	Currently on CWG

Worksheet #2

Activity: Essential Function Identification

Identify three or more major organizational functions that support performance of your organization's mission. Instructions are found in the first column. Remember: essential means the function cannot be deferred or delayed, or transferred to another organization.

Organizational Functions Worksheet

Function	Requirement to Perform Function	Products or Services of Function	Customer	Non-Essential (X)	Essential Function (X)	Essential Supporting Activity (X)
Include a description of the function in basic terms.	List the applicable statute, regulation, presidential directive, or other legal authority.	List the products or services delivered, or actions each function accomplishes.	List the customer(s) who receive the products or services. Customers can be internal or external.			

Business Process Analysis Data Sheet: Instructions

Business Process Analysis Data Sheet	
EF Statement and Description:	A concise statement of what your Essential Function (EF) is and a description. What does it do? This is not a complete process flow, as that will come later.
EF Outputs (Step 1):	Identify products, services, and information (i.e., deliverables or outputs) that result from performance of the EF. An organization also identifies the partners and stakeholders that receive the outputs. The description should include appropriate metrics that identify specific performance measures and standards, as the EF output timeframes will inform the BIA.
EF Inputs (Step 2):	Identify products, services, information, supplies, equipment, and other resources (i.e., inputs) required to perform the EF and deliver the EF outputs, which may be internal to the organization or depend on external partners. Organizations should identify what input is required, from whom, and when, as the input may be required at the beginning of EF performance or as the functional process proceeds. The input descriptions should include delivery time requirements, which will inform the BIA.
Dependencies and Interdependencies (Step 3):	Identify dependencies and interdependencies with partners and stakeholders required to perform the EF, to include other government organizations, critical infrastructure owners and operators, non-governmental organizations, private sector organizations, and others as appropriate. The description should include information on the ability and expectations of dependent organizations to provide required inputs during a disruption to normal operations.
Leadership (Step 4):	Identify organizational leadership required to make decisions and perform other key actions necessary to perform the EF. The description should include the location of appropriate senior leadership, specifically if their action can be performed remotely or they are needed at a certain facility, as well as communication requirements to support EF performance.
Staff (Step 5):	Identify staff required to perform the EF. The description should include appropriate knowledge, skills, abilities, expertise, experience, certifications, licenses, clearances or permissions needed, and the number of staff required to perform the EF.
Communications and Information Systems (Step 6):	Identify communications and information systems required to perform the organization's EFs. The description should include specific capabilities or data needed, classification requirements, and any other unique requirements. The description should also include information on system dependencies and interfaces with other systems or data sources.
Alternate Location Requirements (Step 7):	Identify facility requirements needed to perform the organization's EFs. The description should include space, configuration, security, safety, support services (e.g., lodging, food services, medical support), and storage requirements appropriate for the organization's operations.
Resources and Budgeting (Step 8):	Identify resource and budget requirements to perform the EFs for whatever time period is required by the organization's governing directives, authorities, etc. following a continuity activation or until normal operations are resumed. Resources not yet captured in the BPA process may include standard operating procedures, essential records, and reference materials required for EF performance. The description should include and account for funding requirements for all identified resources needed to perform the EF and any supporting activities.

Business Process Analysis Data Sheet
Process Details (Step 9): Develop a narrative description that captures all information gathered during Steps 1-8 and describes the process of performing the EF. The organization will develop appropriate diagrams or other informational aids to support the narrative description. Documenting the process will not only describe how the EF is accomplished, but will also validate the information compiled and limit omission of any details.
Other Comments: Organizations can add any other details not previously captured.

Worksheet #3

Activity: Conduct a Business Process Analysis

Business Process Analysis Data Sheet (EF #1)
EF Statement and Description:
EF Outputs (Step 1):
EF Inputs (Step 2):
Dependencies and Interdependencies (Step 3):
Leadership (Step 4):

Business Process Analysis Data Sheet (EF #1)
Staff (Step 5):
Communications and Information Systems (Step 6):
Alternate Location Requirements (Step 7):
Resources and Budgeting (Step 8):
Process Details (Step 9):
Other Comments:

Business Process Analysis Data Sheet (EF #2)
EF Statement and Description:
EF Outputs (Step 1):
EF Inputs (Step 2):
Dependencies and Interdependencies (Step 3):
Leadership (Step 4):
Staff (Step 5):

Business Process Analysis Data Sheet (EF #2)
Communications and Information Systems (Step 6):
Alternate Location Requirements (Step 7):
Resources and Budgeting (Step 8):
Process Details (Step 9):
Other Comments:

Business Process Analysis Data Sheet (EF #3)
EF Statement and Description:
EF Outputs (Step 1):
EF Inputs (Step 2):
Dependencies and Interdependencies (Step 3):
Leadership (Step 4):
Staff (Step 5):

Business Process Analysis Data Sheet (EF #3)
Communications and Information Systems (Step 6):
Alternate Location Requirements (Step 7):
Resources and Budgeting (Step 8):
Process Details (Step 9):
Other Comments:

Worksheet #4

Activity: Conduct a Business Impact Analysis (Step 1 & 2) and the Risk Mitigation Process (Step 3)

See directions in Entry #1 of the Business Impact Analysis and Risk Management Worksheet below. Step 2 must be completed before Step 3.

BIA/RISK MITIGATION WORKSHEET: Threat and Hazard Analysis			
EF Number and Statement:			
	Step 1	Step 2	Step 3
Entry #	Threat or Hazard	Threat or Hazard Characteristics and Potential Impacts	Mitigation Strategy
1	Input Threat or Hazard	Input the threat or hazard characteristics and likely effects on the organization or region. It is important to provide enough data to help characterize the likelihood of occurrence and evaluate the EF vulnerability and impact.	Identify mitigation approaches to reduce vulnerability. More than one option may be developed.

3			
4			

Worksheet #5

Activity: Planning for Human Resources

List your continuity personnel (position, not name) by Essential Function.

Continuity Personnel Roster	
Function	Title/ Position
EXAMPLE EF #1:	Division Head, Enforcement and Remediation Division <i>Alternate: Deputy Division Head, Enforcement and Remediation Division</i>
EF #1	
EF #2	
EF #3	
EF #4	

Position responsible for ensuring Continuity Personnel Roster is up to date:

Worksheet #6

Activity: Orders of Succession

Orders of succession should:

- ☐ *Designate at least three individuals, where possible, to manage EFs and other critical operations.*
- ☐ *List successors in the order they would assume the role.*
- ☐ *Include devolution counterparts.*
- ☐ *Include geographically dispersed individuals, where possible, to ensure at least one candidate who would not be subject to injury or illness in the primary facility.*
- ☐ *Be described by positions or titles, rather than names to limit revisions to plan.*
- ☐ *Be regularly reviewed by the organization's legal department.*
- ☐ *Be designated and maintained as essential records.*

SAMPLE Order of Succession List

Position	Designated Successors
EXAMPLE: Director, Bureau of Water Management	1. Deputy Director, Bureau of Water Management
	2. Division Head, Enforcement and Remediation Division
	3. Division Head, Standards and Planning Division
Position:	1.
	2.
	3.
Position:	1.
	2.
	3.
Position:	1.
	2.
	3.
Position:	1.
	2.
	3.

SAMPLE Orders of Succession Requirements

Succession Requirement	Requirement Description
Conditions under which succession takes place:	
Method of notification:	
Conditions under which authority returns to the agency leader:	
Factors in identifying successors:	
Rules and procedures officials must follow to complete this activity:	

Position responsible for ensuring orders of succession are up to date:

Worksheet #7**Activity: Continuity Event Communications**

Look back to the threats/hazards on your BIA Worksheet. Create at least three alerts or notifications for both a no-notice event and an event with at least 24 hours-notice.

Continuity Event Communications Tracking Table				
Alert/Notification	Trigger	Sender	Receiver	Method

Position responsible for ensuring the Continuity Event Communications Tracking Table is up to date:

Worksheet #8

Activity: Plan Preparation

Identify tasks to update or complete your organization's Continuity of Operations Plan. Use the table on the following page as a reference for the Relevant Course Topic/Activity column in the table on page 1.

Plan Preparation Tasks

Task	Relevant Course Topic/Activity
Additional Tasks/Notes	

Unit/Continuity Plan Template References

Topic/Activity	Continuity Plan Template Reference
Unit 2: Stakeholders	Continuity Plan Template for Non-Federal Entities: • Interdependencies, pg. 1 • Alert & Notification, pg. 15 • Contact Rosters, pg. 16 Continuity Plan Template for Federal Departments and Agencies: • Alert and Notification Procedures, pgs. 11-12
Unit 3: Identify Essential Functions	Continuity Plan Template for Non-Federal Entities: • Essential Functions, pgs. 1-3 Continuity Plan Template for Federal Departments and Agencies: • Annex A, Essential Functions, pgs. A-1 – A-4
Unit 4: Conduct a BPA Conduct a BIA	Continuity Plan Template for Non-Federal Entities: • BPA: Essential Functions, pgs. 1-3 • BIA: Essential Functions/Business Impact Summary, pgs. 1-3 Continuity Plan Template for Federal Departments and Agencies: • BPA: Annex A, Essential Functions, pgs. A-1 – A-4 • BIA: Annex A, Essential Functions, pgs. A-1 – A-4
Unit 5: Complete BIA-Risk Mitigation Process	Continuity Plan Template for Non-Federal Entities: • BIA: Essential Functions, pg. 1 • Mutual Aid Agreement Template: Alternate Locations, pgs. 17-20 • Essential Records Database: Essential Records, pg. 4 • Communications Systems Tracking Table: Communications, pg. 14 • Continuity Event Communications Tracking Table: Continuity Event Communications, pgs. 15-16 Continuity Plan Template for Federal Departments and Agencies: • BIA: Annex A, Essential Functions, pgs. A-1 – A-4 • Risk Mitigation: Annex I, Risk Management, pg. I-1 • Mutual Aid Agreement Template: Annex D, Continuity Facility Information, D-2 • Essential Records Database: Annex C, Essential Records, pgs. C-1 – C-4 • Communications Systems Tracking Table: Continuity Communications, pg. E-1

Topic/Activity	Continuity Plan Template Reference
Unit 6: Planning for Human Resources Orders of Succession	Continuity Plan Template for Non-Federal Entities: • Human Resources, pgs. 6-10 • Orders of Succession, pgs. 10-11 Continuity Plan Template for Federal Departments and Agencies: • Annex G, Human Resources, pgs. G-1 – G-2 • Annex F, Orders of Succession, pgs. F-1 – F-3
Unit 7: Plan Preparation	Continuity Plan Template for Non-Federal Entities: • Reconstitution, pg. 21 • Devolution, pg. 23 • Budgeting & Acquisition, pg.26 • Multi-Year Strategic Planning, pg. 27 • Test, Training, and Exercise, pg. 28 • Support Appendices, pgs. 33-36 Continuity Plan Template for Federal Departments and Agencies: • Reconstitution Operations, pgs. 14-17 • Devolution, pgs. 17-18 • Budgeting & Acquisition, pgs. 20-21 • Multi-Year Strategic Planning, pg. 20 • Test, Training, and Exercises, pg. H-1
